

**FLEET
BOARD**

GUIDE
REINSTALLATION
FLEETBOARD COCKPIT

PLEASE IMPLEMENT BY 29.09.2018 AT THE LATEST –
THEREAFTER, FLEETBOARD SERVICES CAN NO LONGER BE USED ON OLDER COCKPIT VERSIONS

RE-INSTALLATION OF FLEETBOARD COCKPIT

STEP 1

- Start FleetBoard Cockpit
- Click in the navigation at the top on "Settings", then on "Settings"

The screenshot shows the FleetBoard Cockpit dashboard interface. At the top, there is a navigation bar with a menu containing 'Settings' and 'Help'. The 'Settings' item is highlighted with a red rectangular box. Below the navigation bar, the dashboard displays a 'Welcome!' message and a navigation menu with 'Dashboard', 'Services', and 'Admin'. The main content area features a world map background and several data widgets. The 'Drive consumption (l/h)' widget shows a consumption of 22,86 l/h. The 'Driving style' widget shows a grade of 9,55. The 'Inbox' widget shows a message from 'Driver the 0041. drive...' at '26.06. 10:42'. The 'Due maintenance services' widget shows 'No data available'. A 'Subscribe to newsletter' link is also visible.

RE-INSTALLATION OF FLEETBOARD COCKPIT

STEP 2

- Click on "Connection"
- Note your settings under "Connection", such that you can re-enter them after re-installation or take a screenshot and save it.
- Then close the Cockpit
